An ever-better App!

The Legend Boucles @ Bastogne may be the crème de la crème of classic car events, but they also stand out for the ever more impressive ways in which followers and fans can make sure they don't miss out on any of the action. The Legend Boucles application for the 2024 edition is even better. On the first page of the official programme, on sale from Friday at 5.30pm (marquee) for €10, an iOS and Android QR Code can be scanned to download the app. You can then follow the progress of the event on the official radio station, check the rankings and other information, and more. But that's not all! By entering the code also available in the official programme (one code per programme purchased and per smartphone or tablet), you can access the interactive digital part of the programme, with videos of the various RTs, drone photos of key locations (refreshment areas, show points, etc.), various information on these RTs... and their route via Google Map, giving you easier access to the locations you have chosen.

A system working like a GPS for guidance, which will take you to the chosen point in the RT, wherever you are. Last but not least, a live timetable update for each category will let the public know the actual start time of each RT, depending on the ups and downs of the race. What could be better?
